

PHÙNG CHÍ TÂM

COMPUTER SCIENCE STUDENT | AI/ML • DATA • SOFTWARE INTERNSHIP
Ho Chi Minh City | 0941 068 390 | pct2k5@gmail.com | github.com/PC-Tam

PROFILE

Final-year Computer Science student at UEH seeking a full-time internship in Ho Chi Minh City. Academic team-project experience in computer vision, deep learning and real-time web applications, including Vision Transformer experimentation, project planning, task allocation and debugging. Currently rebuilding Python, SQL and Git fundamentals for AI/ML, data and software internship roles.

EDUCATION

University of Economics Ho Chi Minh City (UEH) 2023 - Present
Bachelor of Computer Science (in progress) | Final-year student
Selected coursework: Introduction to Deep Learning, Natural Language Processing, Data Mining, Cloud Computing, Systems Programming, Artificial Intelligence, Machine Learning, Image Processing, Databases, Object-Oriented Programming, Computer Networks.

SELECTED PROJECTS

Real-time Haskell Chat Room / *2-person academic project* GitHub

- Developed frontend pages in HTML, CSS and JavaScript and integrated them with the team's Haskell server.
- Implemented user-facing flows for registration, login, public/private chat, online-user updates and file upload.
- Worked with a teammate to test end-to-end behavior and resolve frontend-integration issues.

GTSRB Traffic Sign Classification | *team deep-learning project* GitHub

- Contributed to the Vision Transformer experiments in a team project comparing ViT and ResNet50 for GTSRB traffic-sign classification.
- Created the project plan, divided tasks among team members and coordinated work across training, evaluation and demo stages.
- Investigated and fixed notebook/runtime and repository-integration issues during development.

TECHNICAL EXPOSURE & CURRENT DEVELOPMENT

Academic foundation: Artificial Intelligence, Machine Learning, Deep Learning, NLP, Data Mining, Image Processing, Databases, Cloud Computing
Project exposure: Python, Haskell, JavaScript, HTML/CSS, PyTorch, Jupyter Notebook, Git/GitHub (team academic projects)
Current focus: Rebuilding Python programming, SQL and Git fundamentals through guided practice
Languages: Vietnamese (native); English (technical reading)
